

Door Sills Selection Guide

If you are working on a project that involves upgrading, replacing or repairing your door sill, you may be overwhelmed and unsure where to start. We are here to help you learn everything you need to know about your sill.

So it's a door sill. How do you tell one from another?

Most of our products on BetterDoor are designed to be compatible with the Endura Products' sills. Before you purchase a replacement part, confirm that our products will work with your sill. To determine this, we recommend you measure the sill channel.

If your sill channel measures around 1 inch, our products are made for you. If your sill channel is wider or narrower, we cannot guarantee a good fit.

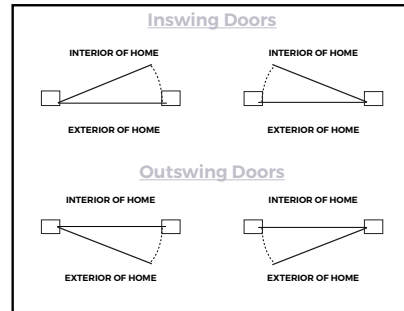

Other Things to Consider

To further identify the sill you have, consider the following 3 characteristics that define your sill.

- **Swing of the Door:** Inswing or Outswing
- **Material of the sill cap:** Wood, Aluminum, or Composite
- **Type of Sill Cap:** Fixed, Adjustable or Self-Adjusting

1 Inswing or Outswing?

Depending on whether your door opens to the outside or to the inside, the sill on your door is different.

Inswing

The door panel will close over the cap, creating a seal between the door bottom and sill cap.

Outswing

The door panel will close up against the cap, above the sill deck.

Inswing Sills:

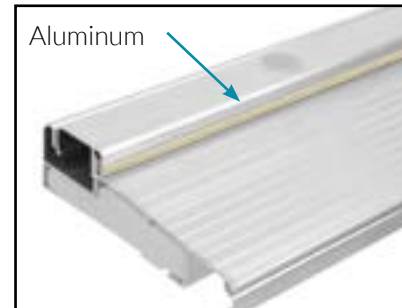

- Endura Aluminum Z-Articulating Cap Sill™ and Sealing System
- Endura Aluminum Z-Series Adjustable Inswing Cap Sill
- Endura Oak Adjustable Inswing Cap Sill
- Endura Z-Articulating Cap Sill™ and Sealing System
- Endura Z-Series Adjustable Inswing Cap Sill

Outswing Sills:

- Endura Z-Series Bumper Outswing Cap Sill

2 Cap Material?

The cap on the sill can be made of different material—wood, aluminum or composite. Each material wears differently based on exterior climate and the elements to which it is exposed.

Wood Sills:

- Endura Oak Adjustable Inswing Cap Sill

Aluminum Sills:

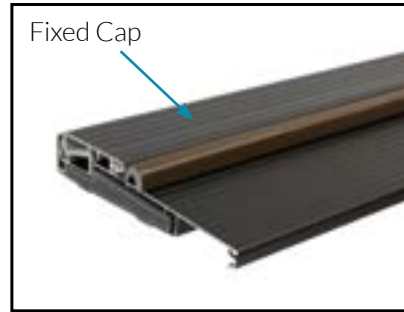

- Endura Aluminum Z-Articulating Cap Sill™ and Sealing System
- Endura Aluminum Z-Series Adjustable Inswing Cap Sill

Composite Sills:

- Endura Z-Articulating Cap Sill™ and Sealing System
- Endura Z-Series Adjustable Inswing Cap Sill
- Endura Z-Series Bumper Outswing Cap Sill

3 Cap Type?

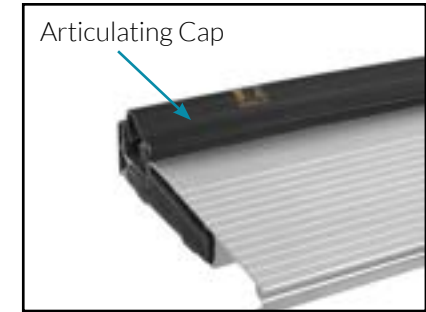

The sill cap may be adjusted with screws in the cap, or it may be fixed. Endura's Z-Articulating Cap Sill™ auto-adjusts and is already mobile!

Look for a continuous surface along the cap of your sill.

Look for screws within the cap that can adjust the cap up or down. These screws may be sealed with cap plugs.

Press down on the cap to feel for a spring-loaded base.

Fixed Cap Sills:

- Endura Z-Series Bumper Outswing Cap Sill
- Endura Fixed Vinyl Cap Sill (Only components sold on BetterDoor.com)

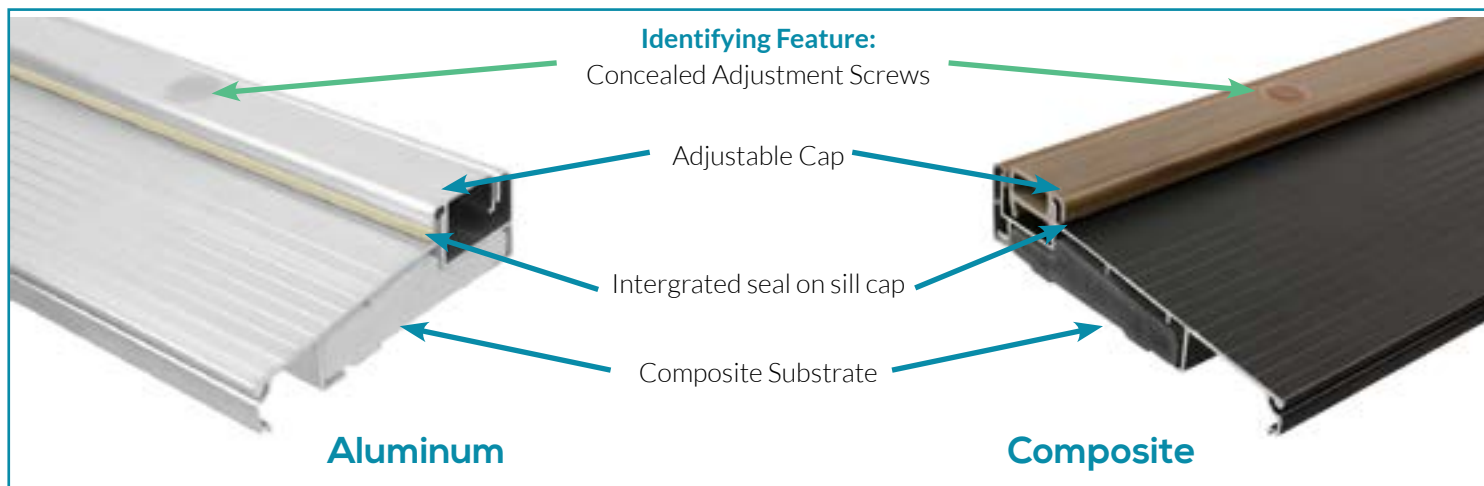

Adjustable Cap Sills:

- Endura Aluminum Z-Series Adjustable Inswing Cap Sill
- Endura Z-Series Adjustable Inswing Cap Sill
- Endura Oak Adjustable Inswing Cap Sill

Articulating Cap Sills:

- Endura Aluminum Z-Articulating Cap Sill™ and Sealing System
- Endura Z-Articulating Cap Sill™ and Sealing System
